SKILLS

- **Languages**: C++, JavaScript, C, Python, Java
- **Frameworks**: HTML and CSS, Springboot,Nodejs,Reactjs
- **Tools/Platforms**: MySQL, MongoDB, Matplotlib,Streamlit,
- **Soft Skills**: Team Work, Quick Thinker, Leadership, Problem-Solving, Communication

PROJECTS

Real -Time Monitoring Dashboard May 2025

- Developed a real -time system performance monitoring dashboard to track CPU,memory and network usage with interactive visualizations.
- Implemented live Data fetching and Updates at regular intervals using Python (psutil) for system metrices collection.
- Designed a user-friendly GUI using Tkinter,integrating dynamic charts with Matplotlib for clear data representation.
- Built an aler mechanism to notify users when system resources exceed predefined thresholds,improving system awareness and control.
- Structured the application with modular code for scalability and efficient performance handling.
- Added real-time data updates showing CPU,Memory and network usage every few second
- Built alert system that shows warnings when system resource go above safe limits

Teck Stack: Tkinter,Python,Psutil,Matplotlib

Ecommerce-MegaBuy Website **December 2025**

- Developed a full-stack E-commerce web application using React.js, Node.js, and Express.js
- Designed a responsive UI with HTML, CSS, and React for improved user experience
- Implemented user authentication and built RESTful APIs for products, users, and orders
- Integrated shopping cart functionality and CRUD operations for product management
- Managed database (MongoDB/MySQL) and ensured smooth navigation using React Router

Teck Stack :Nodejs, Express.js, MongoDB,HTML,CSS,Javascript,Jwt,React

TRAINING

Fundamental of Data Structure: Learn, Apply and Build Project -LPU **July 2025**

- Completed structured training focused on core Data Structures & Algorithms using Java.
- Practiced problem-solving with arrays, linked lists, stacks, queues, trees, graphs, and recursion.
- Strengthened Java fundamentals through hands-on coding exercises and real-time assignments.

CERTIFICATES

- Fundamental of data Structures and Algorithms – LPU July 2025
- Learn C Programming – Beginner to Master – Udemy February 2024
- Responsive Web Design -Freecodecamp November 2023
- Introduction to Hardware and software-Coursera November 2023

Extra-Curricular Activities

- **Women's Development & Empowerment**: June 2024
  Community Development Project on the promotion of women's development and empowerment by an NGO
- Engaged in the Build-a Thon Hackathon, enhancing skills in Coding,teamwork, and real world problem- solving in a competitive environment.

EDUCATION

Lovely Professional University Punjab, India
Bachelor of Technology - Computer Science and Engineering: **CGPA:** 6.68 August 2023 - present

Bal Bharti School Prayagraj, Uttar Pradesh
Intermediate; Percentage:85.2% April 2020 - March 2022

Jamuna Christian Junior High School Prayagraj, Uttar Pradesh
Matriculation; **Percentage: 80%** April 2018 - March 2020

Technical Philosophy & Approach

As a Full Stack Developer, my primary objective is to build scalable, secure, and user-centric applications. I believe that great software is built on a foundation of clean code, robust architecture, and seamless user experiences. Whether I am developing a high-performance backend system using Java and Spring Boot, or crafting responsive interfaces with React, my focus remains on solving complex problems through elegant technical solutions.

I approach every project with a strong emphasis on system design and software architecture. By utilizing best practices in database management and building RESTful APIs, I ensure that data flow is efficient and secure.
